Environment Setup

Ralph W. Crosby, PhD.

31-Oct-2022 14:37:00

1 Shared Environment

This is a simple project holding the various files that are shared amongst the Mac and Linux systems. See the individual directories for details.

- Bash Shell
- EMACS
- Fish Shell
- LaTeX
- Microsoft templates
- Python
- Terminator (Obsolete)
- TMUX
- Z Shell

1.1 `dot` file Handling

- Configuration in `dotbot.conf.yaml`
- Installation
    - `brew install dotbot`
    - `rm -rf ~/.config/fish`
    - `dotbot -c ~/SharedEnvironment/dotbot/dotbot.conf.yaml`

1.2 Useful commands:

- Update all git projects in a directory:
  `find . -type d -name .git -exec /bin/bash -c "cd {}/..; pwd; git pull" \;`

1.3 MacOS Hints

- Renaming multiple files
